Medallion Architecture Checklist

A printable checklist for designing and reviewing bronze, silver and gold layers - naming, quality gates, ownership and the questions to ask at each hop.

1. Layer contracts: what bronze, silver and gold each promise
2. Bronze checklist: ingestion, schema drift, audit columns
3. Silver checklist: dedupe, merge, data quality gates
4. Gold checklist: grain, ownership, SLA and locking
5. Naming conventions that survive year two
6. Review questions for architecture sign-off
